

## INGEDE - Annual Events in February 2013 in Munich

In 2013 the annual meetings of INGEDE took place from 13 - 14 February. On 13 Feb the Symposium was held and on 14 Feb the members met for the Communication Platform and General Assembly. Although this time the Symposium took place in the holiday season we had the pleasure to welcome 70 participants. INGEDE went back to the roots and the presentations were held in German language with a simultaneous translation to English. This was quite appreciated by the majority of the participants. Ulrich Höke, INGEDE's chairman, opened the Event and updated the audience on the INGEDE activities in 2012 and the plans for 2013. His talk was followed by Graziano Elegir, Harald Großmann and Dennis Voß who gave the tripartite presentation on the EcoPaperLoop project which is funded by the EU and working hand in hand with INGEDE activities. Graziano Elegir introduced the project in general, Harald Großmann gave an update on the activities dealing with collection systems and Dennis Voss informed about recyclability assessment of packaging products. Siegfried Kreibe from Bifa took up the session "Paper for Recycling: A project for co-

operation along its path to optimize and support the material loop" for the second time with reporting about the results. The first part of the presentation at the INGEDE Symposium 2012 dealt with tools and methods for such a project. The last session in the

morning was given by Ulrich Leberle (CEPI) on resource efficiency in the European paper industry with the vivid title: Doing more with less is what we do best.

After lunch Johann Oberndorfer introduced the topic digital printing. Here Almut Reichart (Federal Environment Agency) informed on backgrounds and objectives of the various Ecolabels. Detlef Schulze-Hagenest contributed with recent developments in digital printing based on the experiences at

## CALENDAR OF EVENTS

4-5 March 2013

**Berliner Recycling und Rohstoffkonferenz**  
Berlin, Germany

5 March 2013

**INGEDE Project 137 12**  
**"Recycling friendly Varnishes"**  
Darmstadt, Germany

15 - 16 April 2013

PTS Fachseminar  
**Qualitätssicherung für Altpapiere und Stickyvermeidung im Prozess**  
Dresden, Germany

16-17 April 2013

**INGEDE working group**  
**Paper for Recycling**  
Location tba

24 April 2013

**Technical Committee Deinking**  
VCI (Verband der chemischen Industrie), Frankfurt

21-22 May 2013

**INGEDE working group**  
**Deinking Process**  
Eilenburg, Germany

12 - 14 June 2013

**Zellcheming Expo**  
Wiesbaden, Germany

drupa 2012 and the Hunkeler Innovation Days 2013. Finally Axel Fischer completed the topic with a report of INGEDE's activities in this field. Michael Fuhrmann introduced the new INGEDE member Weig Karton.

In the third and last part of the program, Peter Engert informed about recent research activities of INGEDE. Presentations on various INGEDE research projects were given by researchers of PTS and TU Dresden. The project work in detail and the projects planned for 2013 were discussed on the day after at the members session Communication Platform.

On the evening of 13 Feb the members and some of the guests got together for a common dinner in a typical Munich restaurant. On the next morning, but not too early, 18 INGEDE members met exclusively for the Communication Platform where all the specific topics like EN 643, ERPC Scorecard, INGEDE projects, INGEDE methods, statistics etc. were presented and discussed.

After lunch, INGEDE held its General Assembly where the finances of 2012 and budget of 2013 were explained to the members.

**Save the date for the next years Symposium on 12 Feb 2014. This will be continued on the following day by the "members only Symposium" the Communication Platform. In the afternoon the General Assembly will be held.**

### PTS Fachseminar: Qualitätssicherung für Altpapiere und Stickyvermeidung im Prozess

Das Fachseminar findet von 15. bis 16.04.2013 in der Holbeinstraße 1 in Dresden statt. Aktuelle Erkenntnisse zu den Themenkomplexen „Altpapiere als Rohstoffe für die Papierindustrie“ und „Klebende Bestandteile in Altpapierstoffen“ werden vermittelt. Andreas Faul wird in diesem Zusammenhang einen Vortrag über die neue EN 643 halten und die detaillierten Qualitätsanforderungen an Altpapiere darlegen
